

Students with diabetes have a right to accommodations when taking standardized tests such as the SAT and ACT. They may need time to check blood sugar or to take a snack if blood sugar is low. These accommodations, however, must be requested in advance.

### **Types of Accommodations**

Typically, students with diabetes can request two types of accommodations.

The first is for permission to have diabetes care supplies with them in the testing area. You can request access to blood glucose testing supplies, snacks and drinks to treat hypoglycemia, and devices such as an insulin pump and/or CGM.

A second common accommodation is for modifications to the testing schedule. If time is needed to check blood sugar, eat snacks or treat lows, requesting breaks will make sure that time will not count against you.

### **Who to Contact**

Accommodations need to be requested by the appropriate testing service. You may contact [The College Board \(for SAT, SAT Subject Tests™, PSAT/NMSQT, PSAT 10, and Advanced Placement® Exams\)](#) or the [ACT](#). It may take 6-8 weeks to obtain, so act early.

### **Be Prepared on Exam Day**

On the day of the exam, bring all documentation regarding modifications that have been granted to the testing facility. Also, be aware that students may be assigned a separate room for testing to minimize distractions for other students.
